

WeatherStation® Multisensors

A Compact, Rugged Instrument for Informed Decision-Making

Ultrasonic Instruments

Rugged Reliability,
Proven Performance.

The Airmar WeatherStation Instruments are unique, as they are the only weather monitoring system that can report Dynamic True and Apparent wind speed and direction/angle in one compact housing with no moving parts or external interfaces.

Ultrasonic Wind Measurement

Dynamic True and Apparent wind speed and direction with no moving parts

Relative Humidity (optional)

Field serviceable RH sensor with calculated dew point

Rain Measurement

Maintenance free acoustic rain measurement including duration, intensity and amount with 95% accuracy

Barometric Pressure

Accurate atmospheric pressure measurement

10 Hz GPS

Position, COG, SOG, time stamping

Solar Stabilization

Solar radiation shield increases the accuracy and stability of temperature and relative humidity readings

Air Temperature

With calculated heat index and wind chill when RH module is installed

3-Axis Compass

With dynamic stabilization and better than 1° accuracy

3-Axis Rate Gyro

For rate-of-turn data

3-Axis Accelerometer

For pitch and roll
